

RIDGEWOOD

ASSISTED LIVING

Ridgewood is an assisted living home committed to providing seniors and their families with quality options for care. Our focus is on supporting and maintaining independence in a safe and respectful environment.

As we age, our needs change. Our philosophy of care supports “Aging-in-Place”. This allows residents to live where they feel comfortable and at home, even as their requirements for care change.

Our team works closely with all our residents and their families to develop individualized care plans to enable independent assisted living with supportive care in a safe environment. Our Residents and their families have told us they want care options to best meet their needs as they age. Our Care Packages are flexible and billed on a monthly basis to assist with budgeting and planning.
